

36th European Colloid and Interface Science Conference (ECIS 2022), Crete, Greece (4 -9 September 2022)

Chinese - European Symposium

Organisers:

Zhenghe Xu (Southern University of Science and Technology, Shenzhen),
Jingcheng Hao (Shandong University),
Jianjun Wang (Chinese Academy of Sciences, Beijing), Hans-Jürgen
Butt (Max-Planck-Institute for Polymer Research, Mainz)

Minoan Crete (2600-1600 BC): First European Civilization

Eastern Jin Dynasty·Gu Kaizhi “Luo Shen Fu Tu” 东晋·顾恺之《洛神赋图》

To stimulate international cooperation, we organize a Chinese-European-Symposium at the ECIS conference 4-9th September 2022 in Crete (<https://ecis2022.org/eu-china-symposium/>). **The Symposium will be Hybrid allowing both onsite and online participations**

Invited and Contributed talks of Chinese and European researchers who work on a topic in the area of Colloid and Interface science:

Topics include fundamental and applied questions regarding polymers, gels, liquid crystals, nanoparticles, emulsions, foams, composites, biomaterials & -surfaces, responsive and active matter. Methods range from design and synthesis of colloidal systems and nanoparticles to multiscale computer modelling. Phenomena dealing with surface forces, self-assembly and wetting are included

Participants may prepare their work for consideration in a special issue of a refereed journal.

Keynote speakers include:

- Xi Zhang (President of Jilin University, Changchun)
- Junbai Li (Institute of Chemistry, Chinese Academy of Sciences, Beijing)
- Yu Fang (Shaanxi Normal University, Xi'an)

Deadline for abstract submission: 14th April, 2022
